

# COMMERCIAL DISINFECTING & SANITATION SERVICE

Kills Viruses, Bacteria  
& Fungi

Disinfects all  
Surfaces

Minimal  
Downtime

## Why Choose our Disinfection Service?

**Modern Disinfectant** – Zoono Z-71 Microbe Shield Sanitiser and Surface Protectant uses new and unique disinfectant technology that allows strong attachment to treated surfaces and long-lasting sanitation for up to **30 days\*** post application.

**Broad Spectrum Activity** – Zoono Z-71 Microbe Shield Surface Sanitiser is an effective disinfectant for hard surfaces against germs, bacteria and COVID-19.

**Use and the Environment** – Z-71 Microbe Shield is non-corrosive, non-leaching, clear, hypoallergenic and approved for food uses in many countries.

## Z-71 MICROBE SHIELD

SURFACE SANITISER  
& PROTECTANT

Z-71 Microbe Shield is made up of purified deionized water and a Quaternary Ammonium compound. These ingredients are commonly used in other products such as toothpaste, contact lens products, cosmetics and soaps.

Fogging is a simple process undertaken by trained staff. Areas need to be free of people, animals and any unnecessary materials lying around should be removed where possible.

We apply a fog based on room size to ensure an adequate amount of product contacts all surfaces. Application rates vary to account for higher wall to floor ratio in smaller rooms.

**Animal handling  
facilities**

**Vehicles &  
Machinery**

**Rural buildings  
and offices**

**Food Preparation  
Areas**

Note: Microbe Shield should not be used on milk contact areas.
